Snowflake
Berlin, Germany

Dear Recruiting Manager,

I am writing to apply for Software Engineer Intern at Snowflake for Summer 2026. I am currently an intended dual major, computer science and math at the University of Central Florida, and I hope to pursue a career in Software Engineering with a niche in cloud engineering and data logistics. I am eager to expand my skill set related to these, especially in refining my skills when it comes to optimizing and increasing the efficiency of data pipelines. My strong skills, and desire to work and lead teams, and analytical thinking ability will allow me to be a strong contributor to a Cloud Infrastructure team at Snowflake.

I am particularly drawn towards a Cloud Infrastructure team at Snowflake because it will give me the opportunity to enhance my skill set in optimizing pipelines in an environment that is fast paced and extremely modern. I am eager to use my prior experience with CI/CD OSS pipelines and vectorized pandas to assist Snowflake in its/their mission to empower enterprises to achieve their full potential.

My experiences with CI/CD OSS pipelines and vectorized pandas have prepared me to be a successful intern at Snowflake. As a software engineer intern at Blackstone, I was responsible for optimizing and increasing efficiency on existing mass scale data pipelines. Through this experience, I learned plenty about working with large, modern pipelines that need to be efficient, which I know will be especially valuable in my work for handling data processing in the cloud. After becoming Treasurer at Knight Hacks, I have developed a strong background in teamwork, and problem solving and am prepared to work with people from all cultures and backgrounds.

As a student, I am excited about the opportunity to learn about cloud infrastructure. I am confident that I have the skills to work at Snowflake. I would welcome the chance to discuss my qualifications with you in greater detail. Please do not hesitate to contact me by email saceriojason@gmail.com or by phone 786-300-5236. Thank you for your time and consideration.

Best wishes,

Jason Sacerio
